FPSO SOLUTIONS

In a floating world, it helps to have a reliable partner.

Years of experience in the energy market teaches us that nothing is static. Projects are invariably complex, change frequently and almost always demand immediate attention.

Achieving a good result is much more likely if client and supplier are an effective working partnership.

Orwell Offshore's reputation as a provider of naval architecture and marine services is based on its talent and commitment to every project.

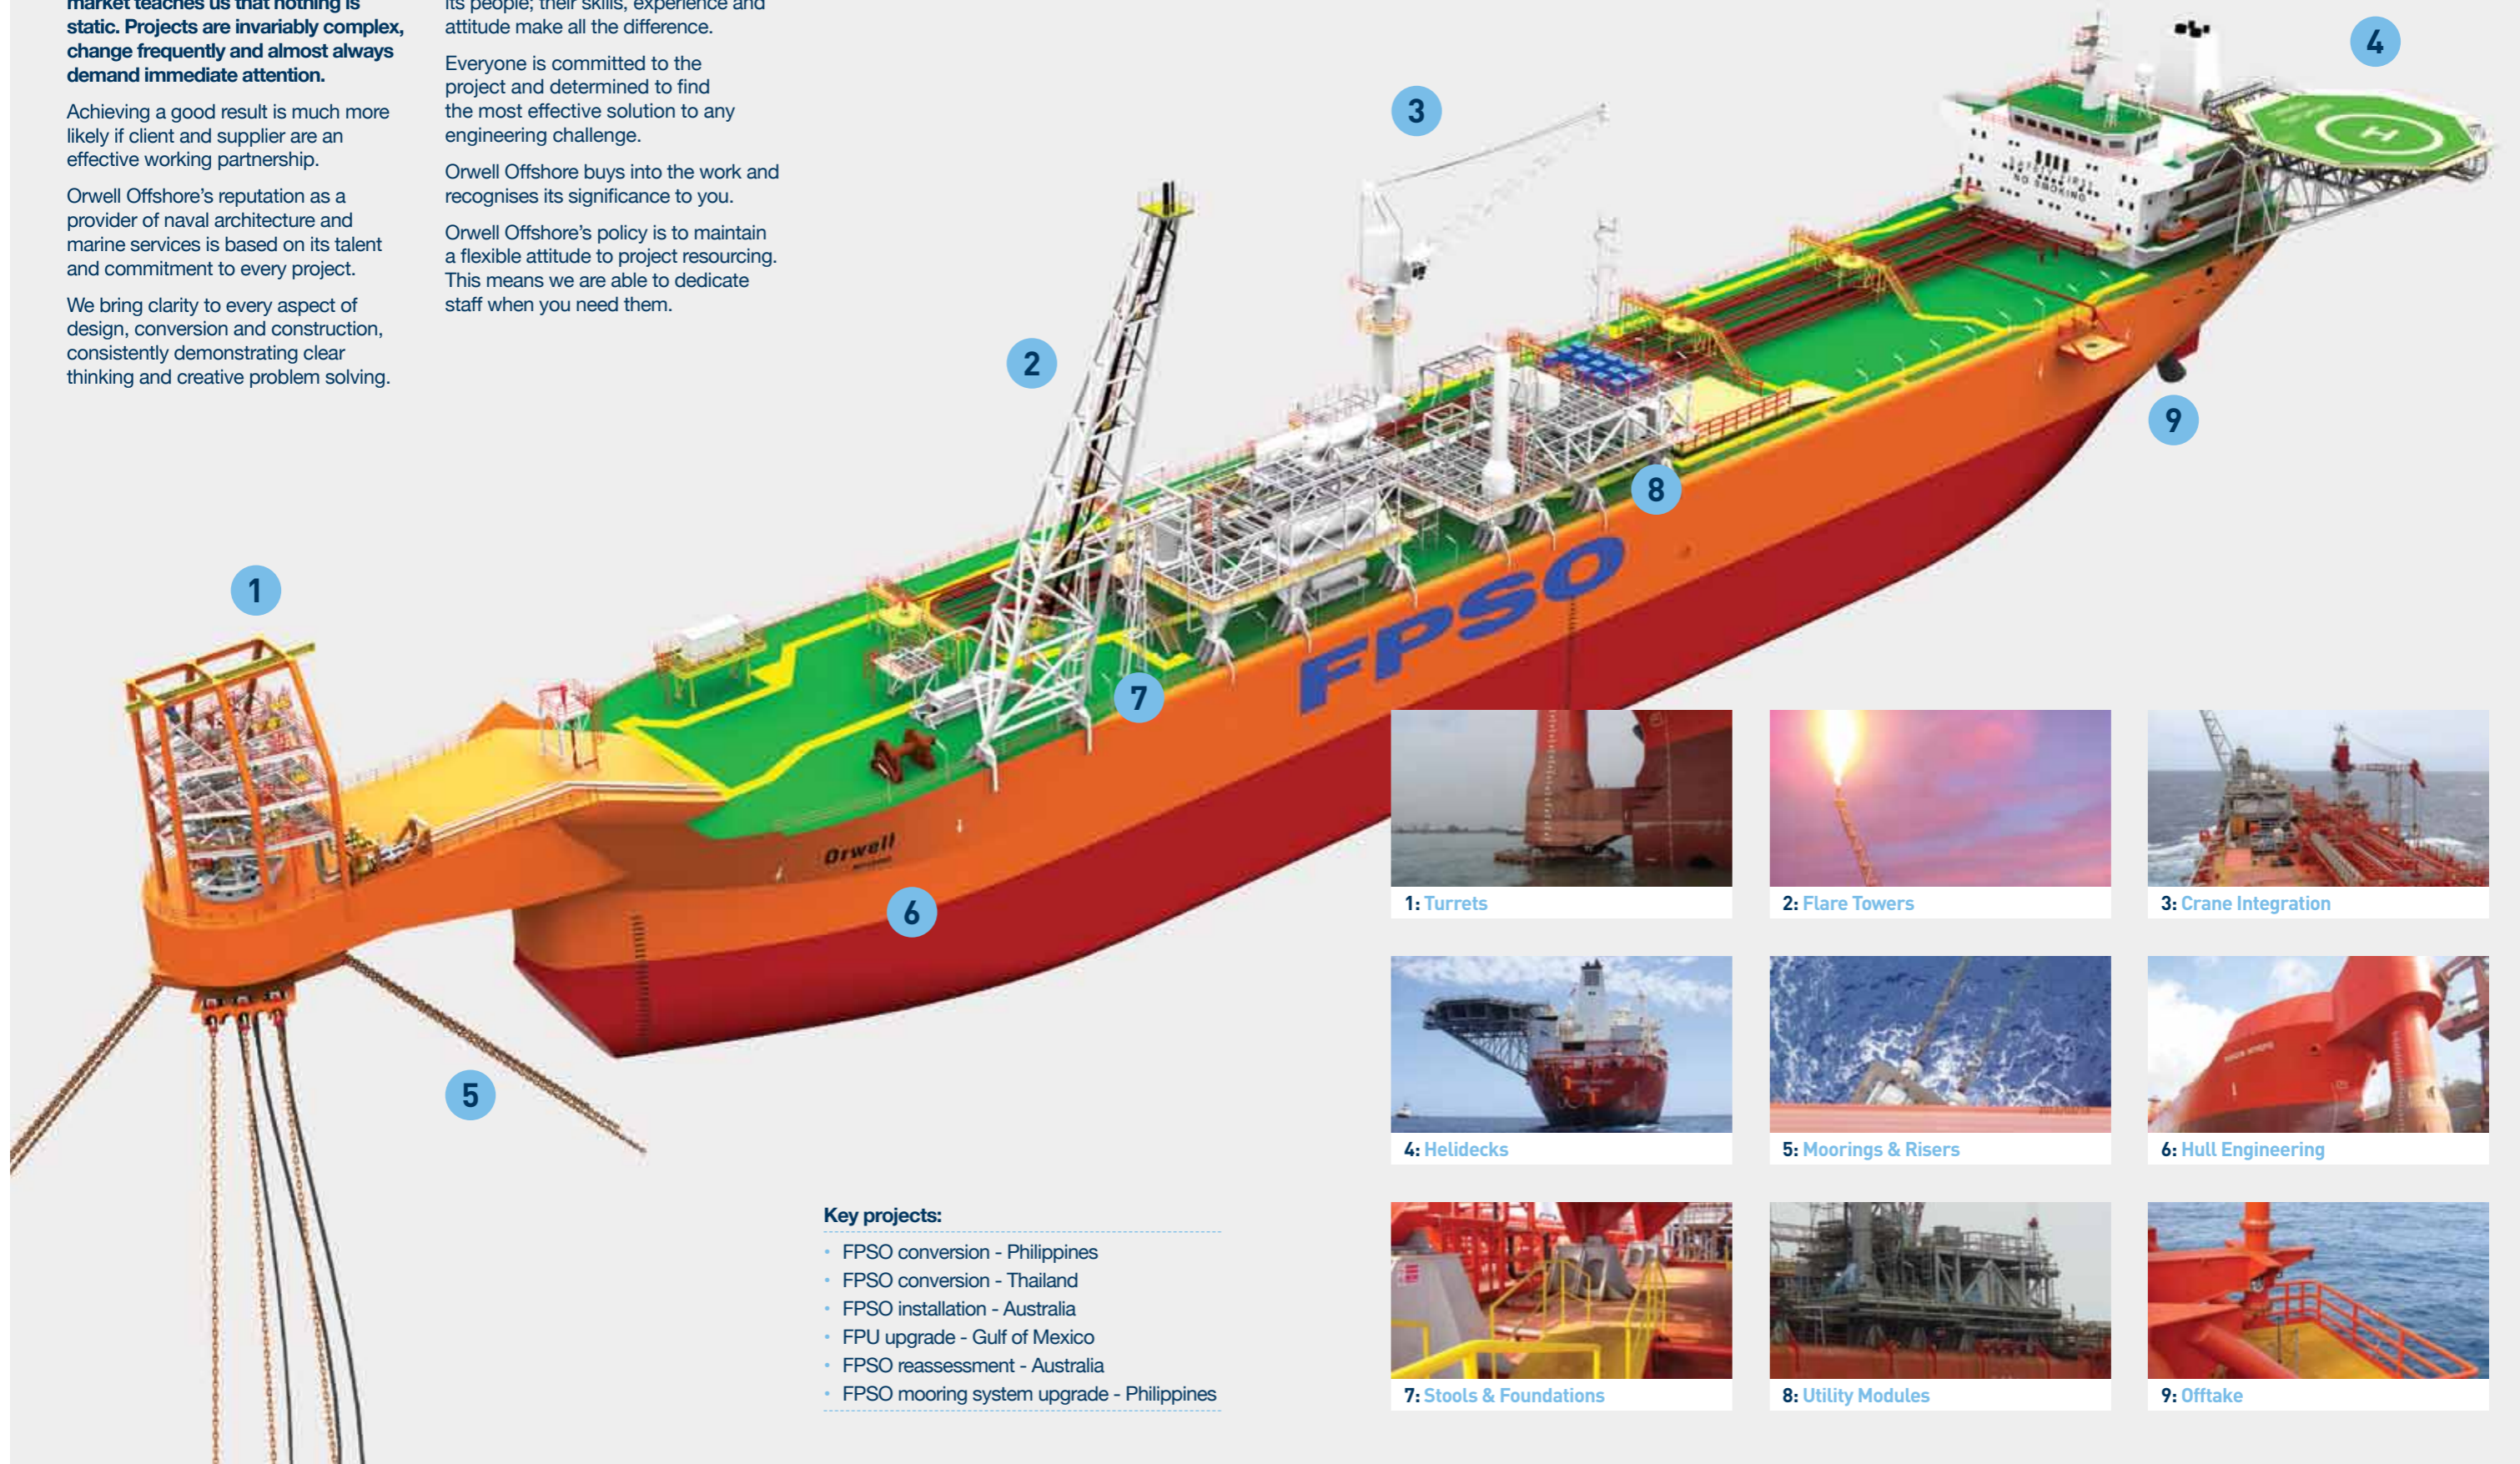

We bring clarity to every aspect of design, conversion and construction, consistently demonstrating clear thinking and creative problem solving.

Orwell Offshore's strength is built on its people; their skills, experience and attitude make all the difference.

Everyone is committed to the project and determined to find the most effective solution to any engineering challenge.

Orwell Offshore buys into the work and recognises its significance to you.

Orwell Offshore's policy is to maintain a flexible attitude to project resourcing. This means we are able to dedicate staff when you need them.
